PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering (AI & ML) student with hands-on experience building and deploying Python and Flask web applications. Developed practical projects in resume analysis and personalized diet planning, with experience in PDF parsing, ATS scoring, skill extraction, BMI-based recommendations, SQL, and responsive web interfaces. Seeking entry-level opportunities in software development, backend development, or AI/ML.

EDUCATION

SRM Institute of Science and Technology, Tiruchirappalli | B.Tech – Computer Science Engineering (AI & ML)

CGPA: 7.48 | Expected Graduation: 2027

TECHNICAL SKILLS

Programming: Python, Java, SQL

Web Development: HTML, CSS, JavaScript, Flask

Database: MySQL

AI/ML: Machine Learning, NLP

Core: Data Structures & Algorithms, OOP, REST APIs

Tools: Git, GitHub, VS Code

VIRTUAL EXPERIENCE

Tata Group – GenAI Powered Data Analytics Job Simulation (Forage) | Feb 2026

- Performed exploratory data analysis to identify customer risk patterns and support business insights.
- Explored AI-assisted approaches for delinquency prediction and collections strategy.
- Prepared business reports and summarized findings using data storytelling concepts.

PROJECTS

AI Resume Analyzer Pro | Python, Flask, NLP, Machine Learning, HTML, CSS, JavaScript

Live Demo: <https://ai-resume-analyzer-pro-1jrv.onrender.com/>

- Developed and deployed a Flask-based resume analysis web application that parses PDF resumes and extracts relevant skills, keywords, and information.
- Implemented ATS scoring, skill extraction, job-role matching, and personalized resume improvement suggestions.
- Built a responsive interface with modular Python components for parsing, analysis, role prediction, and automated report generation.

AI Diet Planner | Python, Flask, SQL, HTML, CSS, JavaScript

Live Demo: <https://ai-diet-planner-pj2r.onrender.com/>

- Developed and deployed a web application that generates personalized weekly diet plans from user inputs.
- Implemented BMI calculation using height and weight inputs and used the result to provide diet recommendations.
- Built the application with Flask and SQL around a simple, user-focused workflow.

CERTIFICATIONS & ACHIEVEMENTS

- AI Agentathon 2026 Participant
- Microsoft Career Essentials in Generative AI
- HackerRank Python (Basic & Intermediate)
- Database Structures and Management with MySQL – Meta / Coursera
